John Doe

Software Engineer | Data Enthusiast

Email: john.doe.fake@example.com | Phone: (555) 123-4567 | LinkedIn: linkedin.com/in/johndoe-fake | Location: San Francisco, CA

Professional Summary

Dedicated software engineer with 5+ years of experience in full-stack development, machine learning, and natural language processing. Proficient in building scalable applications and working with embedding models like Sentence Transformers for semantic search and similarity tasks. Passionate about AI-driven solutions and open-source contributions.

Work Experience

Senior Software Engineer

Tech Innovations Inc., Remote

January 2021 – Present

- Developed and deployed microservices using Python, Flask, and Docker, handling 10M+ daily requests.
- Implemented semantic search features using Sentence Transformers and FAISS, improving search accuracy by 35%.
- Led a team of 4 engineers in migrating legacy systems to cloud infrastructure (AWS).
- Optimized database queries, reducing latency by 50%.

Machine Learning Engineer

AI Startup Labs, Seattle, WA

June 2018 – December 2020

- Built NLP pipelines for text classification and embedding generation with Hugging Face Transformers.

- Fine-tuned models like all-MiniLM-L6-v2 for domain-specific sentence embeddings.

- Collaborated on research projects involving cosine similarity for recommendation systems.

- Contributed to open-source repositories on GitHub.

Education

Bachelor of Science in Computer Science

University of Example, CA

Graduated: May 2018

- GPA: 3.8/4.0

- Relevant Coursework: Machine Learning, Natural Language Processing, Data Structures, Algorithms

Skills

- Programming: Python, JavaScript, SQL

- Frameworks/Libraries: PyTorch, Hugging Face Transformers, Sentence Transformers, scikit-learn, React

- Tools: Git, Docker, Kubernetes, AWS, PostgreSQL

- Other: Semantic Similarity, Vector Databases (Pinecone, FAISS), Agile Methodology

Projects

Sentence Transformer Practice Tool

Personal Project, 2025

- Created a demo application for embedding resumes and job descriptions to compute semantic matches using cosine similarity.

- Used all-distilroberta-v1 model for efficient sentence embeddings.

Certifications

- AWS Certified Solutions Architect (2023)

- Hugging Face NLP Course Completion (2022)
